### THE WONDER OF THE AGE The "Omega"

Odorless Gas Stove

Marks a revolution in gas heating and household sanitation. Perfect combustion is secured by the generation of intense heat and the thorough mixing progressively of the gas supply with air, by which it is possible to use at least forty-five cubic feet of air to every cubic foot of gas. Its operation combines three important and indispensable factors-economy in fuel, perfect combustion, sterilization. In the 'OMEGA" they are the result of mechanical combinations produced as the result of extensive scientific research. On exhibtion and for sale by

A cheap barometer, in which a leech

NEW YORK, Nov. 6.-The course of stock prices was exceedingly erratic all of to-day and the closing prices were not far from last night's level. The constantly varying movement was seemingly due to the groping efforts of the professional operators to discover the current in the market. The result of their experiments seemed to show that there was no current. Speculative sentiment has, in fact, come to a standstill, and is waiting for developments. The factors which have induced the recent downward tendency of prices are still in force to some extent, but the well- established principle of speculative markets to discount the future makes it doubtful when a current movement of prices has run an adequate course to accomplish this object. Apprehension still of gold with a resulting squeeze of money rates in the local market. The advancing tendency of wages and the high prices of materials keep alive the uneasiness, over the proportion of the earnings which will be left for stockholders. But it may be possible that the considerable decline in prices which has already occurred may be sufficient to discount these possibilities. At all events the bear operators who have gone short of the market took sufficient account of this possibility to want to buy stocks to cover their short contracts. The advances caused by this buying met renewed selling of a rather concentrated character. The origin of this selling was a mystery and opinion was divided as to whether it came from the bears or was further liquidation of long accounts. The stocks most active in the trading were those which have been recent favor-

ites in the speculation. There were gains of 1 to 11/2 at one time in about a dozen railroad stocks and half as many specialties. Cotton oil had the benefit of its dividend declaration. Sugar broke sharply after early strength because of fears of a further cut in prices and rumors of a rate war at Missouri river points. The coalers were under some pressure over reports of renewed trouble at the collieries of some of the independent operators and Lackawanna suffered, in addition, on the showing of earnings for the September quarter, which revealed a re-corresponding period of last year, of \$1,-

Money rates were rather firm and foreign exchange was also firmly held. Published reports of the renewals of American loans in Paris had some effect in relieving apprehension over the foreign exchange outook, although local international banks attached little importance to the report. The weekly statements of the Bank of England and the Bank of France showed continued decline in their gold reserves, the former institution losing upward of \$3,000,000 and the latter about half a million dollars. The closing of the stock market was easier, with some of the issues at the lowest of the day. The movement of bonds was narrow and

irregular. Total sales at par value were \$2,090,000. United States bonds were all unchanged on the last call. Following are the day's share sales and the recorded price changes:

> CHICAGO, Nov. 6 .- Dullness prevailed on the Board of Trade to-day and wheat was lower. December closing 4c down, corn 14@%c lower and oats unchanged. January provisions closed from 5c lower to 5@71/2c

Wheat ruled dull, with operations largely of a scalping nature. There was a fairly good buying of May while the selling pres-sure, which has been much in evidence the past few days, was almost entirely absent. Visconsin Central fours..... 91% A fair general demand, together with the early strength in corn, caused a strong tone during the greater part of the day. Realizing by longs late in the session caused a decline and the close was steady. December opened unchanged to 1/sc lower at 71%c to 71%c, and after selling off to 71%c advanced to 71%c, but declined toward the close to 71c and final figures were 4c lower at 71%c. Clearances of wheat and flour were equal to 550,000 bu. Primary receipts were 1,432,000 bu, against 963,000 a year ago. Minneapolis and Duluth reported receipts of 871 cars, which, with local receipts of ninety-two cars, two of contract grade, made a total of 963 cars, against 1,001 last week and 642 a year ago. Corn was quiet and irregular, with local sentiment inclined to the bull side. There was some selling pressure on December early, while elevator interests were credited with selling November. Shorts were the best buyers, the rains West and Southwest causing them much uneasiness. Selling was chiefly by longs in the way of liquidation. Less urgent demand late in the day brought about a decline, but the close was firm. December closed 1/2%c lower at 50%@50%c. after selling between 50%c and 511/2c. Receipts were 141 cars, twentyeight of contract grade.

Oats were featureless and the volume of business was light. The market was firm on a good cash demand, together with a 10 Columbia National Bank....... 1111/2 lack of any selling pressure. The close was steady, with December unchanged at 29%c. The range for the day was between 29%@ 29%c and 30c. Receipts were 112 cars. Provisions were under the leadership of lard and with small stocks of that commodity and a material decrease in the receipts of hogs the opening was strong. Realizing by longs brought a reaction later in the day, with shorts and commission houses good buyers. The close was slightly easier, except on lard. January pork closed 5c lower at \$15.45, lard was 5@7%c higher at \$9.421/2@9.45, while ribs were 21/2c lower at \$8.221/2c.

UNION STOCKYARDS, INDIANAPOLIS, Nov. 6.-Cattle-Receipts, 800; shipments, 250. The rather small, indicating a decrease of nearly 700 compared with the same time last week and 1,400 compared with the corresponding time a year there are very few sales to report at extreme full strength of the market. There seemed to be better competition, and all fat stock sold promptly at more satisfactory prices than yesterday. There were not many cases, however, in which there was any quotable advance. Sales for the most part they are bringing what is considered their market value compared with other places. The good to choice butcher cows and heifers are selling possibly stronger than other grades of cattle. There is little or no outlet for unfinished cattle of any kind, and it is very difficult to consummate sales. The good strong feeders are selling usually up to expectations, only fair prices. The best steers here to-day averaged 1,276 lbs and sold at \$6.10, two good Hereford heifers brought \$5, and the top price for cows was \$4.50. Quotations: Good to choice steers, 1,350 lbs and

receipts to-day were almost 2,500 larger than a week ago, but fully 1,000 smaller than a year ago. The market opened with more buyers in the field than yesterday, and with quite an improvement in the demand from outside sources and favorable reports from other places, the bidding was active and the supply was soon changing hands properly hanging hands promptly at unevenly higher prices. The hogs averaging from 185 ibs up-wards were the most desired. Consequently they were the easiest to sell and show the principal advance in prices. Very few that answered that description were less than 10c higher, while in several cases it was believed that the advance was 15c. In a number of instances light hogs were reported only 5c higher, but no doubt quite a number sold 10c above ye sterday. and the general average of the market vas considered at least a dime higher. A few loads came in on late trains, and they were taken promptly at fully steady to firm prices com-pared with those current earlier in the day. For an extreme prices ranged from 36.35 to \$6.85, and the bulk of the supply sold above \$6.50. Quotations:

compared with the same time last week and 1,200 compared with the corresponding time a year ago. The receipts to-day were only about onefifth as large as a week ago and a year ago. There were not enough to interest all buyers, and especially shippers, as they could not get enough to complete a shipment. The demand was very fair, however, from local batchers, and it did not take long to exhaust the supply at steady prices compared with yesterday. The at steady prices compared with yesterda?. continued limited supplies this week have put the market in rather a healthy condition, and there is no doubt that a considerably larger supply could have been sold to-day at current prices. Lambs were reported as high as \$5, and several bunches sold at \$4.75. Sheep sold at \$3.15 @3.35, and bucks at \$2.50. Quotations:

A Book That Was Not Read. New York Evening Post.

In the library of a New Yorker, whose books are a hobby, is one volume greatly prized. It occupies an inconspicuous place. nowever, and is never read; its pages are never so much as opened, yet it is eloquent to its owner. It is a work on English literature, a standard text-book, and more or ess worn. To intimate friends who appreciate souvenirs the volume is sometimes shown, and even they do not open its pages, The reason the pages are never opened is adequate, they have been pasted together in a rectangular block. This is what the owner prefatorily tells those to whom he shows the book: "A long time ago I was a cadet at the

United States — Academy. Smoking was forbidden, but indulged in, and eigarwas for ettes had to be secreted past finding. Therefore the pages of this innocent looking vol-Hogs-Receipts, 6,500; shipments, 2,000. The receipts of hogs thus far this week indicate a gin, making a very neat box in which to
